

## Hospital Quality Comparison

The following table compares higher performing hospitals within 65 miles from Ottawa, local hospitals and other OSF Healthcare hospitals.

Definitions:

### **CMS (Center for Medicare and Medicaid Services) Star Ratings:**

The overall star rating for hospitals summarizes quality information on important topics, like readmissions and deaths after heart attacks or pneumonia. The overall rating, between 1 and 5 stars, summarizes a variety of measures across 5 areas of quality into a single star rating for each hospital. The 5 measure groups include:

- Mortality
- Safety of care
- Readmission
- Patient experience
- Timely and effective care

The overall rating shows how well each hospital performed on an identified set of quality measures compared to other hospitals in the U.S. The more stars, the better a hospital performed on the available quality measures. Some new or small hospitals may not report data on all measures, and therefore, aren't eligible for an overall hospital rating.

### **Leapfrog Hospital Safety Grade:**

The Leapfrog Hospital Safety Grade uses up to 30 national performance measures from the Centers for Medicare & Medicaid Services (CMS), the Leapfrog Hospital Survey and information from other supplemental data sources. Taken together, those performance measures produce a single letter grade representing a hospital's overall performance in keeping patients safe from preventable harm and medical errors.
